

Audi connect key

Requirements:

- 1) Active dealer-verified * myAudi account (key user agreement)
- 2) Compatible smartphone with Near-Field Communication (NFC) technology**
- 3) myAudi App

* See "First steps" in the Quick Start Guide

** NFC for selected Android smartphones only. For a list of compatible smartphones, see the database of mobile devices at: www.audi.com/bluetooth

1 Setup

Once you have set up the Audi connect key, your smartphone has the same features as a conventional vehicle key, so you can open and close your car and start the engine. You can also conveniently give this digital key to other people* without having to physically hand over a key.

Open the myAudi app on your smartphone and select a vehicle that has the Audi connect key optional equipment

Scroll down to the "Audi connect key" section and then select "Authorise"

To start the authorisation process, select "Me" or "Another person"

Then start the compatibility check for your smartphone. If you are authorising someone else, enter the email address of the recipient instead

PIN

Confirm by entering your 4-digit PIN

Security code

Enter the 6-digit security code in your myAudi app

You can view the code on the MMI of your Audi under:

- Settings & Service
 - Audi connect key
 - Retrieve security code

Note: The security code is only valid for 120 minutes! If the code expires, you must restart the authorisation process

The Audi connect key will be installed on the recipient's smartphone.

2 How to use

Your Audi connect key has been assigned successfully. You can now use it for your Audi. To use your Audi connect key, please note the following:

Make sure NFC is activated on your smartphone for contactless data transfer. Check the settings on your smartphone for more information

To open and close your car, hold your smartphone in the centre of and close to the door handle of the driver's door

To start your vehicle, put your smartphone in the universal mobile phone holder in the centre console

Press the start/stop button to start the vehicle

* You can assign up to five digital keys

3 Revoke authorisation

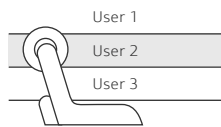

As the (main) key user, you can use the myAudi app to revoke the digital key for any authorised person at any time, and then re-sign it if you wish. The steps to do so are described below.

Open the myAudi app on your smartphone and select a vehicle that has the Audi connect key optional equipment

Scroll down to the "Audi connect key" section. Select "Display all authorisations" and then "Edit"

Select the applicable user/users. Then press "Delete" and confirm by pressing "Revoke authorisation" *

The digital key of this user is now deactivated and the user will be notified

* To cancel any authorisation you have received, select "Return authorisation" instead

4 Deactivate the Audi connect key in the vehicle

Deactivating the Audi connect key switches off your Audi's NFC. It is temporarily not possible to use any assigned digital keys**. You can deactivate the Audi connect key on the MMI of your vehicle as follows:

Switch on the ignition of your Audi with a conventional vehicle key

On the MMI of your Audi, select

- Vehicle
- Settings & Service
- Audi connect key

Use the slider to deactivate the feature

All users of the digital key are notified that the key has been deactivated

** You do not have to reassign existing authorisations when you re-activate the Audi connect key in your vehicle.

5 Audi connect key card

The Audi connect key card is part of the Audi connect key optional equipment. It is deactivated by default and can be activated for situations such as a workshop visit. You then do not need to give your smartphone (as the digital key) to anyone else. You can easily enable the key card in your Audi.

Put your smartphone into the universal mobile phone holder in the centre console. Use an Audi connect key to switch on the ignition

Take your smartphone out of the mobile phone holder in the centre console

Put the key card into the universal phone holder in the centre console and follow the instructions on the MMI

The key card is now activated. The MMI displays the status

Note: The key card is automatically deactivated when you switch on the ignition with your Audi connect key or a conventional vehicle key

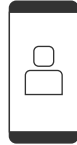

Summary: What do I need and where?

Vehicle/MMI

- You are already logged in as the (main) key user in the vehicle (for more information on the process to log in on the MMI, see the Quick Start Guide "First Steps")

Smartphone/myAudi app

- Compatible smartphone with NFC technology
- myAudi account
- You are a (main) key user verified by an Audi partner
- 4-digit PIN (key user agreement)
- 6-digit security code
